General Conclusion

In the opinion of the members of the B. team the interrogations were successful. While it appeared obvious that some of subjects statements made under [redacted] B/3 were inaccurate, misleading and possibly false - nevertheless, it appeared that sufficient new information was obtained to re-establish and re-open a case that had reached an obvious impasse.

Furthermore based upon the interrogations in the instant case, it is the absolute conclusion of the B. team that the [redacted] techniques are extremely valuable and will with the money and time spent in the exploration and development of these techniques will undoubtedly result in a great deal more information becoming available. B/3

Specific Comments

(1) Members of the B. team, while agreeing that the above interrogations were successful are not in complete agreement as to

(A) The effectivness of the H techniques used.

(B) Whether or not H technique contributed a great deal or much little to the results obtained.

(2) Members of the B team agree that further work and experimentation is necessary in perfection of the H techniques along with [redacted] via drugs. B/3

(3) Members of the B team agree that it is essential that hydro-spray hypospray instruments and various types of ampules be purchased or contracted for immediately.

(4) Members of the B team agree that field equipment in the follow categories is poor and new top grade equipment should be sent overseas at once.

(A) Recorders, microphones etc.

(B) Photographic equipment, all types including infra-red.

(C) Medical equipment for B operations (this should be assembled,

packaged, sent out from hdqts. so that B team members would not have to carry unusual equipment with them. This should include drugs, needles, medical instruments, hypro sprays, ampules for spray etc).

(D) "Special tool kits"- These kits should contain special and standard tools for repairing, assembling etc. the above setout equipment.

(5) Members of the B team agree that until the above equipment is sent out -

(A) Either that B team should have exact knowledge of the field equipment availabe, or

(B) Light portable equipment should be forwarded ahead of or taken with the B team on future operations.

(6) Members of the B team agree that if possible a longer time should be allowed between request for B team work and sending a B team into the field.

(7) Members of the B team agree that before a B team leaves hdqts., the field office of the agency should have come to some more or less definite conclusions as to the ultimate disposition of any individual to to interrogated by the B team. It should always be born in mind that considerable embarrassment would result if it were known that this agency was supporting this type of activity.

(8) Members of the B team agree that, if humanly possible, only trusted agency personnel participation in B cases. While it is recognized that this agency may be inadequately staffed in many ____ locations, the use of [redacted] or merely hired help in B operations shpuld be kept at the absolute minimum.

(9) Members of the B team agree that under no circumstances should any future B subject be threatened with the use of drugs, truth serums etc. if

the subject fails to talk by other known methods. B teams will always attempt to find and use a cover for [redacted] techniques. B/3
